

74. The novelty of the research mentioned in the text is related to the

- A) unveiling of what exactly allows us to learn in our sleep.
- B) unexpected contradiction of what was already known.
- C) age of people involved and to the way their dreams were reported.
- D) fact that they were supposed to speak while sleeping.

Assunto: Interpretação Textual e Vocabulário

No quarto parágrafo, o trecho que diz "... scientists in general are moving closer to understanding precisely what goes on in the brain..." sugere que estão revelando-se novos fatos sobre a relação dormir-aprender. A melhor alternativa, portanto, é a opção A.

Item: A
