

77. As to the methodology used in the research, a group of participants had to learn associations between words and pictures of objects or scenes and then

- A) while taking a nap, had half the words played again.
- B) sleep while listening to a recording of all the words.
- C) fall asleep thinking of the words and images.
- D) take a nap and study the associations again.

Assunto: Interpretação textual e vocabulário

Essa questão está centrada na metodologia usada na pesquisa (“as to the methodology”). Podemos localizar esse assunto no parágrafo 9, que se inicia “To test their hypotheses”. Daí em diante, segue o passo a passo do experimento. Na última frase “To those who napped, ‘Half of the words were (...) replayed during the nap to trigger the reactivation of the newly learned picture memories”, as expressões “napped” e “nap” se referem a “cochilo”, e “replayed” refere-se a “played again” na primeira opção.
