Questão 07

Looking at the vegetation that has covered the surface of a lake, a young man asks the watchman standing next to him: - Sir, how long does it take for this vegetation to cover the lake?- I'm not really sure about it, but according to experts, it doubles its size every week! It's been a month since the last time it was cut and it has already covered half of the lake. After this conversation, the young man started thinking about it, trying to calculate how long it would take for the vegetation to cover the lake surface completely. Can you calculate it?
